

Maryland Telephone Announces Open House to Help Local Businesses Take Advantage of Intelligent Communications Technology

TOWSON, MD — April 23, 2008 — Maryland Telephone, the region's leader in business communications, announced today that the company will hold an open house at their facility to illustrate how local companies can take advantage of the many benefits of Intelligent Communications technology. This technology is driving the profitability and competitive advantages of organizations and its Maryland Telephone's mission to convey the value of it to support the overall growth of the region. A number of presentations as well as live demonstrations will be held throughout the day on Thursday, May 8th from 7:30 am to 7:00 pm.

Insightful businesses are embracing Intelligent Communications to reduce the complexity of communications with their clients and employees. Utilizing Intelligent Communications blends an organization's desktop telephone, wireless, conferencing, and video seamlessly and securely, no matter where they are. Maryland Telephone offers a wide variety of solutions that can improve business

processes for everyone in an organization. These solutions can be tailored to fit the organization's people, job functions, and applications. Maryland Telephone's communications solutions enable a customers, suppliers, or co-workers to communicate with others within the organization easily and quickly.

"Our open house is designed to inform companies on the latest trends impacting communication environments," said Michael Cook, president of Maryland Telephone. "Our goal is to educate those individuals in charge of their voice and data networks so they can make better business decisions. Everyone in attendance will have an opportunity to see firsthand the power of Intelligent Communications."
