

Hosted PBX (HPBX)

Evolve IP's hosted phone system solution delivers award-winning collaboration (video, chat, conferencing and more) and crystal clear voice services that integrate with all business applications used today; dramatically easing deployment and user adoption. Our internationally available IP phone system with unified communication (UCaaS) apps frees organizations from the hassle of managing carriers, hardware and vendors.

Evolve IP is committed to delivering a ubiquitous, customized, global experience to all customers. Our data center currently spans 4 continents providing services in over 25 countries around the world.

To successfully compete in business your associates must be able to connect anywhere with clients, and each other, on the devices of their choice. Crystal-clear voice services are expected; to get ahead, your enterprise must be visible, present and able to collaborate & integrate instantly.

Why choose Evolve IP for hosted phone system?

Evolve IP's HPBX solution provides businesses with enterprise-grade cloud business communication & collaboration services that help enhance user productivity & customer experience. With over 40+ CRM integrations, our award-winning phone system offers world-class voice quality & advanced end-user features that helps eliminate maintenance headaches & increases network uptime for user across all locations around the world.

Benefits:

- **Application Integration:** "Telephony enable" your applications with over 40 prebuilt CRM integrations or leverage our APIs and custom development services to build your own
- **Limitless Capacity:** In-country unlimited usage, local phone numbers, free in-network calling, and a cost-effective, consistent International rate plan across all locations
- **Flexibility to pick your device:** Use your own compatible handsets or we'll include Polycom VVX or Yealink HD handsets
- **Business Continuity/Disaster Recovery:** Maintain communication regardless of technology, power or carrier failures
- **Mobility:** Deliver advanced services to users across all platforms and on the road: Windows, MAC, IOS and Android compatibility
- **Scalability:** Add users and services when needed and leverage the support of experienced PBX professionals 24x7
- **Rapid Deployment:** Businesses can expand and grow across the globe quickly and seamlessly - there are no limitations on which countries work with Evolve IP's solution
