# EVOLVE IP
THE CLOUD STRATEGY COMPANY™

UC-One

Evolve IP's UC-One improves employee productivity in the office and on the road by fully integrating voice, video, instant messaging & presence, desktop sharing, corporate directory, and audio/web conferencing across platforms, to any location.

Inc. Magazine reported that 67% of organizations increased mobile worker productivity by implementing unified communications.

Evolve IP's UC-One

Being 'out of office' is no longer a viable reason to miss critical communications - an expectation that's driving more enterprises to embrace the concept of unified communications as a powerful competitive advantage. Businesses need desktop and mobile applications to maintain calling from their enterprise phone system. UC-One is a cloud-based, enterprise-grade, unified communications application that allows you to connect anywhere and collaborate instantly.

Why use Evolve IP's UC-One?

Technology is moving fast and so are your employees. Mobile phones, instant messaging, video calling, and screen sharing can bring employees, partners, and customers together. UC-One delivers on the promise of unified communications by providing the productivity-enhancing features your employees need in a consistent and secure environment. UC-One can be delivered without complicated integration work, and connected to your existing business phone number.

Key Features

- **Instant Messaging and Presence (IM&P):** With integrated phone state and calendar, Evolve IP's IM&P feature helps users see their colleagues' availability (on a call, in a meetng, out for lunch) real-time.

- **Multi-party Conferencing:** Users have the ability to collaborate real-time, schedule and record meetings for hundreds of participants, share screens with everyone on the conference, view the presenter's screen or even transfer control of the screen.

- **Two-way Desktop Sharing:** Collaborate with your colleagues regardless of location by sharing your screen via your preferred web browser.

- **Audio & Video Calling:** Create more engaging personal relationships by virtually meeting face-to-face with multiple participants using soft phone from mobile and desktop.

- **Mobile App Integration:** Users can seamlessly transition calls from desktop to iOS and Android mobile devices using their business phone number.

- **Email and Unified Messaging:** Work in the email platform of your choice and integrate with any custom application that you like for a complete UC experience. Evolve IP's unified messaging enables users to receive all their messages (email, voicemail, dax) on one inbox, click-to-dial from the same email application, view colleague's phone presence and more.
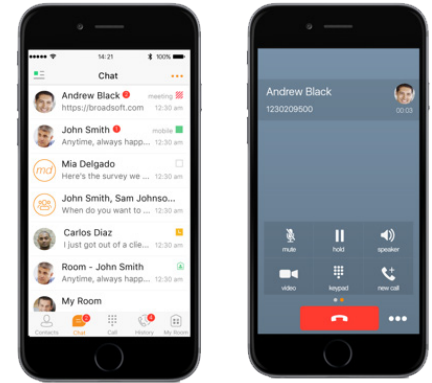

UC-One

- **Call Center and Call Recording Controls:** Users will have access to key call center controls at their finger tips. UC-One allows your users to place inbound/outbound calls with the ability to put the call on hold or mute, transfer the call, create a conference call and end the call.
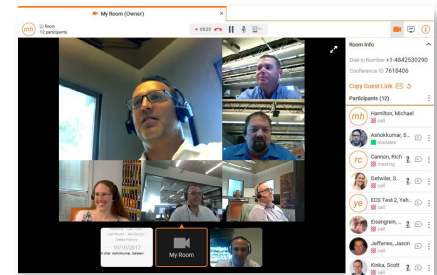

Additional Features

- File Sharing
